WEAK LENSING SCIENCE WITH EUCLID: AN OVERVIEW

T. Schrabback<sup>1</sup>

<sup>1</sup>*Argelander-Institut für Astronomie, Universität Bonn, Auf dem Hügel 71, 53121,  
Bonn, Germany*

Weak gravitational lensing is one of the two primary techniques for the extraction of cosmological information from the *Euclid* data. I will provide a brief introduction into the field and illustrate some of the measurements that will be enabled by *Euclid*.
